

## **Spirit Mound Trust announces *The Grassland Research Grant Program* with grants up to \$1500.**

**Application deadline: 2/1/2024**

Awarded by 3/15/2024

The Spirit Mound Trust Grassland Research Grant Program is administered by the Spirit Mound Trust (SMT), a non-profit organization dedicated to the purchase, preservation, and restoration of Spirit Mound Historic Prairie. The SMT has been working to restore Spirit Mound to its original tallgrass prairie conditions and to promote the natural beauty and history of Spirit Mound (<http://www.spiritmound.com/spiritmoundtrust.html>). The Trust works closely with the South Dakota Department of Game, Fish and Parks to manage the site.

Grants may be awarded for research involving any topic related to North American grasslands (e.g., flora and fauna, natural history, cultural history). Preference will be given to research focusing on the tallgrass prairie ecosystem, especially if the 320-acre reconstructed prairie at Spirit Mound can be used as one of the study sites. Grants may be awarded to qualified graduate or upper-division undergraduate students majoring in a relevant discipline, qualified non-professional individuals, and college or university faculty. SMT grants are payable up to \$1500.

Funding will be provided for projects of one-year duration. Funding for a second year of research for the same project will be considered, but a separate application providing justification for the second year of funding is required. SMT invites applications for the 2024 summer field season. Applications must be submitted by email to the SMT Grant Committee at [info@spiritmound.org](mailto:info@spiritmound.org). Deadline for applications is 1 February 2024. The winner will be notified by 15 March 2024.

The application must include the following:

1. The applicant's name, address, and email address, and information about the applicant's background and qualification for doing the research. This statement is not to exceed 250 words.
2. A title for the proposed project.
3. A statement detailing the purpose(s) and objective(s) of the research: the methods, techniques (including any analytical techniques that may be used), materials needed for the project, and a timeline for meeting project goals. This statement is not to exceed 1200 words.
4. A budget for funding requested detailing the specific use of the funds in the project. This statement is not to exceed 600 words.
5. A statement regarding plans for dissemination of the findings of the research at appropriate professional meetings or publication in professional peer-reviewed journals. This statement is not to exceed 250 words.
6. The applicant's assurance that the grant will be used solely and specifically for the designated research project.

**Other requirements:** The applicant must arrange for two individuals to send letters of recommendation directly to the SMT Grant Committee at [info@spiritmound.org](mailto:info@spiritmound.org). Letters of recommendation should include an appraisal of the applicant's qualifications for pursuing the proposed research. The letter should also indicate the significance of the proposed research for advancement of knowledge about North American grasslands and their natural or cultural history.

Successful applicants will receive a check for the grant's authorized amount from the SMT Treasurer on or before 30 April 2024. Successful applicants will be required to submit a 1-page summary report, suitable for general audiences, to the Spirit Mound Trust at the conclusion of the study for inclusion in the SMT annual newsletter and will be expected to give a brief summary presentation at a meeting of the SMT Board of Directors (either in person or virtually).
